

POWATEC UV Curing System UF-300 UF-300

- Fully adjustable dose from 100mJ/cm² to 1200mJ/cm²
- Exposure time 0.5 to 3 sec.
- Typical throughput 200 -300 wafers/hour (depending on type of UV tape)
- Homogeneous distribution of light +/- 5%
- Lowest total cost of ownership (COO)!
- No Ozone gas generation
- No warm up time (full power from power on)
- Up to 95% less power consumption
- No IR emission. Ideal for heat sensitive materials
- No bulb degradation
- Extended light source life
- Lower operating cost
- Easy to use
- Monitoring the LEDs via voltage drop
- Integration in product line possible with CAN bus connection
- Deep diagnosis (traceability) and detail configuration via CAN bus
